

5.9 Comments

A **comment** is text in a program intended just for humans reading the program, rather than for the processor executing the MIPS, a comment is any text on a line following the # symbol.

```
lw $t1, 0($t6)    # This is a comment
add $t1, $t1, $t1  # Another comment
# And yet another comment
```

PARTICIPATION ACTIVITY

5.9.1: Comments.

Given the following code, indicate which is a comment.

```
lw $t2, 0($t6) # Load DM[2000]
# add $t2, $t3, $t4
# FIXME: Finish the
program soon
#####
# 6/3/16
```
